VENNA VENKATA NAGIREDDY

JAVA FULL-STACK DEVELOPER
Guntur, Andhra Pradesh, India | +91 7207694210 | vennanagi884@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Java Full-Stack Developer with hands-on experience building secure, user-focused applications using Java, Spring Boot, React.js, and MySQL. Developed DealHunts, a platform that brings offline shops online through inventory management, product comparison, product verification, and slot booking. Building VISENTRA, an AI-based road-safety system that analyzes rear-vehicle movements using computer vision. Also developed cybersecurity projects in email spam detection, vulnerability scanning, and secure authentication. Seeking an entry-level Java Full-Stack Developer role to solve real-world problems through practical software solutions.

TECHNICAL SKILLS

Programming: Java, JavaScript, SQL, Python
Frontend: React.js, HTML5, CSS3
Backend: Spring Boot, Spring MVC, Spring Security, REST APIs, JPA/Hibernate, JWT
Databases: MySQL, Oracle, PL/SQL
Core Concepts: Object-Oriented Programming (OOP), MVC, Role-Based Access Control (RBAC), REST API Design
Maps & Location: React-Leaflet, Leaflet, OpenStreetMap, Nominatim, Browser Geolocation API
AI & Computer Vision: PyTorch, OpenCV, NumPy, RF-DETR, CurveLaneS, Metric3D, ByteTrack, EMP-M, EMP-D
Development Tools: Git, GitHub, Postman, Maven, IntelliJ IDEA, VS Code, Cloudinary

PROJECTS

DEALHUNTS — Full-Stack Local-Shop Digitalization & Inventory Management Platform *Feb 2026 – Aug 2026*
Java, Spring Boot, React.js, MySQL, Spring Security, JWT, JPA/Hibernate, React-Leaflet

- Developed a full-stack platform with 50 individual pages that brings offline shops online, enabling vendors to manage products and inventory while customers discover local shops and compare products and prices.
- Built Spring Boot REST APIs and integrated MySQL using JPA/Hibernate to manage products, categories, brands, vendors, and shop inventory.
- Implemented separate Admin, Vendor, and Customer roles: Admin manages the platform, Vendors manage inventory and sales through POS, and Customers browse products, verify product details, and book shopping slots.
- Integrated JWT authentication, role-based access control using Spring Security, and interactive maps for nearby-shop discovery, supporting a more convenient and reliable shopping experience.

VISENTRA — AI-Based Rear-Vehicle Safety & Collision-Risk Warning System *Jul 2026 – Present*
Python, PyTorch, RF-DETR, CurveLaneS, Metric3D, ByteTrack, EMP-M, EMP-D, OpenCV

- Developing a camera-based safety system designed to help users identify potentially dangerous situations involving faster vehicles approaching from behind and moving into or across their lane.
- Combines RF-DETR for vehicle detection, CurveLaneS for lane detection, Metric3D for depth estimation, and ByteTrack for tracking vehicle movements across video frames.
- Exploring EMP-M and EMP-D trajectory-prediction models to anticipate possible vehicle movements and support earlier warnings about potential collision risks.
- Integrates model outputs into a Python video-processing pipeline with vehicle and lane visualizations, using latest-frame processing to reduce delays and improve responsiveness.

INTERNSHIP EXPERIENCE

Cybersecurity Intern — THIRANEX *May 2026 – June 2026*

- Developed an Email Spam Detection project using machine learning to identify suspicious email patterns and classify unwanted messages.
- Built a Python-based Vulnerability Scanner to scan open ports, detect service banners, identify potentially outdated software, and generate vulnerability reports.
- Developed a Python-based Secure Login System with user registration, authentication, password hashing, SQL injection protection, session management, and logout functionality.

EDUCATION

B.Tech — Computer Science & Engineering (Data Science) *2027*
NRI Institute of Technology, Guntur | CGPA: 8.2/10

Intermediate — MPC *2023*
Narayana Junior College, Guntur | Percentage: 86.2%

SSC *2021*
Kendriya Vidyalaya, Guntur | Percentage: 65.6%

CERTIFICATIONS

Java Programming Certification *June 2025*
Python Programming Certification *August 2023*

LANGUAGES

Telugu, English, Hindi
