VENNA VENKATA NAGIREDDY

JAVA FULL-STACK DEVELOPER

Guntur, Andhra Pradesh, India | +91 7207694210 | vennanagi884@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Java Full-Stack Developer with hands-on experience in Java, Spring Boot, React.js, and MySQL, including REST API development, JPA/Hibernate, JWT authentication, and role-based access control (RBAC). Built DealHunts, a full-stack platform combining online product comparison, local-shop inventory, and interactive map-based shop discovery. Developing Visentra, a computer-vision project for vehicle detection and lane-boundary visualization. Seeking an entry-level Java Full-Stack Developer position; B.Tech graduation expected in 2027.

TECHNICAL SKILLS

Programming: Java, JavaScript, SQL, Python
Frontend: React.js, HTML5, CSS3
Backend: Spring Boot, Spring MVC, Spring Security, REST APIs, JPA/Hibernate, JWT
Databases: MySQL, Oracle, PL/SQL
Core Concepts: Object-Oriented Programming (OOP), MVC, Role-Based Access Control (RBAC), REST API Design
Maps & Location: React-Leaflet, Leaflet, OpenStreetMap, Nominatim, Browser Geolocation API
AI & Computer Vision: PyTorch, OpenCV, NumPy, RF-DETR, CondLaneNet, Depth Anything V2
Development Tools: Git, GitHub, Postman, Maven, IntelliJ IDEA, VS Code, Cloudinary

PROJECTS

DEALHUNTS — Full-Stack Product Comparison, Local Inventory & Map-Based Shop Discovery Platform

Java, Spring Boot, React.js, MySQL, JPA/Hibernate, JWT, Cloudinary, React-Leaflet, Leaflet, OpenStreetMap, Nominatim, Browser Geolocation API

- Developed a full-stack platform with a React.js frontend and Spring Boot REST APIs that brings online product listings and local-shop inventory together, so users can compare product options and find where to buy them locally.
- Built interactive map-based shop discovery using React-Leaflet, Leaflet, and OpenStreetMap, with Nominatim for location search and the Browser Geolocation API for the user's location (with permission), helping users find nearby local shops and see where they are.
- Implemented vendor-managed shop inventory that connects each local shop's stock to the products shown to users, supported by REST APIs for products, vendors, inventory, categories, and brands.
- Designed separate Admin, Vendor, and User dashboards, using JWT authentication and role-based access control with Spring Security to separate access by role.
- Persisted application data in MySQL using JPA/Hibernate, and integrated Cloudinary for product-image uploads and management.

VISENTRA — AI-Based Vehicle Detection, Lane Visualization & Computer-Vision Pipeline

Python, PyTorch, RF-DETR, CondLaneNet, Depth Anything V2, OpenCV, NumPy

- Developed a multi-model computer-vision pipeline in Python that integrates RF-DETR for vehicle detection, CondLaneNet for lane-boundary detection, and Depth Anything V2 for relative scene-depth estimation on camera frames.
- Used PyTorch, OpenCV, and NumPy to run model inference and draw detected vehicles and lane boundaries as visual overlays on camera frames.
- Isolated each model's dependencies in dedicated Python environments, allowing models with different requirements to run within a single pipeline.
- Implemented worker-based inference with latest-frame handling, so each worker processes the most recent frame instead of a backlog of outdated ones; depth output is treated as relative depth, not verified real-world distance.

INTERNSHIP EXPERIENCE

Cybersecurity Intern — THIRANEX *May 2026 – June 2026*

- Developed and tested a machine-learning-based spam/phishing email detector that flags suspicious email patterns, applying data-analysis techniques.

EDUCATION

B.Tech — Computer Science & Engineering (Data Science) *Expected Graduation: 2027*
NRI Institute of Technology, Guntur | CGPA: 8.2/10

Intermediate — MPC *2023*
Narayana Junior College, Guntur | Percentage: 86.2%

SSC *2021*
Kendriya Vidyalaya, Guntur | Percentage: 65.6%

CERTIFICATIONS

Java Programming Certification *June 2025*
Python Programming Certification *August 2023*

LANGUAGES

Telugu, English, Hindi
